

SandHELIX™ Fine Material Washer

TerraSource Global's SandHELIX™ Fine Material Washers are engineered for heavy-duty performance, delivering unparalleled efficiency in attrition, sand classification, and final dewatering.

The SandHELIX™ ensures effective removal of unwanted sand gradations, clays, and deleterious materials, optimizing your output quality. Available in both single and twin-shaft configurations, TerraSource Global's washers are designed to exceed expectations in durability and precision.

Our innovative equipment designs, combined with full automation and other value-added features, provide producers with the lowest cost-per-ton of high quality sand production while maximizing equipment longevity.

High Performance,
Heavy Duty Aggregate
Processing Equipment

Key Features and Benefits

- Large, Customized Feed Box Configurations
- Maximum Weir Travel / Adjustment
- Complete Automated Control of Rising Current and Chase Water
- Dodge Drive / Bearing Components
- Heavy-Duty Feed Section Built with AR36 Plate Steel (.500")
- Multiple Flight Wear Shoe Options
